Report on the Seminar: "Digital Academic Ecosystem: A Deep Dive" at S P College, Srinagar

On December 17, 2025, the Internal Quality Assurance Cell (IQAC) and the Admission Committee of the College, under the dynamic leadership of Principal Prof. Bashir Ahmad Sheikh, organized a seminar titled "'Digital Academic Ecosystem': A Deep Dive into DigiLocker, NAD, ABC, APAAR, API, ERP, and Cyber Hygiene". The event was held at the College Auditorium and commenced at 2:00 pm. The primary objective of the seminar was to provide a comprehensive overview of the various digital tools and platforms designed to streamline academic processes and ensure data security.

The seminar featured Mr. Omar Bhat as the distinguished speaker. Mr. Bhat is the State Head for School/Medical/Higher Education & EPFO at the Ministry of Electronics and Information Technology, Government of India. His expertise in these domains provided valuable insights into the implementation and benefits of the discussed digital initiatives.

The seminar focused on several critical components of the modern digital academic landscape. The key topics discussed included:

- **DigiLocker and NAD (National Academic Depository):** The session explored the use of DigiLocker for the secure storage and sharing of important documents and certificates. The role of NAD in providing a digital depository for academic awards was also highlighted.

- **ABC (Academic Bank of Credits) and APAAR (Automated Permanent Academic Account Registry):** The speaker elaborated on the Academic Bank of Credits, which facilitates the academic mobility of students by allowing them to accumulate and transfer credits. The concept of APAAR, a unique and permanent 12-digit Automated Permanent Academic Account Registry for students, was also explained.

- **API (Application Programming Interface) and ERP (Enterprise Resource Planning):** The technical aspects of integrating various academic systems through APIs were discussed, along with the role of ERP software in managing the day-to-day business activities of the institution.

- *Cyber Hygiene: A crucial part of the seminar was dedicated to Cyber Hygiene, emphasizing the importance of maintaining security and best practices to protect sensitive academic data in the digital realm.*

The seminar on the "Digital Academic Ecosystem" proved to be an informative and insightful event for the attendees. By delving into the specifics of DigiLocker, NAD, ABC, APAAR, API, ERP, and Cyber Hygiene, the session equipped the academic community of S P College with the knowledge necessary to navigate and leverage these digital tools effectively. The event successfully highlighted the importance of embracing these technologies for a more efficient, secure, and student-centric academic environment.
